

Phase 2 Mark Document, Group #11

Info:

Graded by:

[Section 2] Stephen Luc (stephen.luc@mail.utoronto.ca),  
[Section 3] Daniel Persaud (dev.persaud@mail.utoronto.ca)

**Remark Policy & Rubric:** please consult the handout / course syllabus, see mark breakdown section for weighting of deliverables.

Mark Breakdown:

Section 2		
2.1	Product Backlog - Epics (if applicable)	1 /1
2.1	Product Backlog - User Stories	0.5 /2
2.2	Sprint Backlog - Tasks	1 /1
2.2	Sprint Backlog - Sub Tasks (if applicable)	0.5 /1
Section Total:		3 /5
Section 3		
3.1	Single Responsibility Classes	1 /1
3.1	Collaborators	2 /2
3.1	Use of Inheritance	1.5 /2
Section Total:		4.5 /5
Total Mark:		7.5 /10

TA Comments:

- Make sure that all sub tasks inside of your sprints have been assigned to someone (-0.5)
- Make sure that User stories have been assigned story points including ones in the product backlog also 1 story point = 1 work day (-0.5)
- Each User Story should have it's own story, do not group user stories into one issue, instead if you need to group user stories they should be grouped in Epics. Also make sure that all the priorities for the issues match with what's listed in the user story. (1)
- RegisteredUser adds an unnecessary level of inheritance (-0.5)
- what about your GUI related classes?
